My Assurance Background

Paper based inspections, audits and accreditations are common place however they are not the most efficient way of collating data or the best use of your staffs most valuable commodity...time.

MyAssurance is a real time, online app-based tool which helps organisations to manage, track and report on current, historic and future inspections. The app provides the organisation with the ability to create and build their own templates allowing a fully customizable experience. This reduces some of the standard challenges, such as

- Time consuming
- Prone to errors
- No single version of the truth
- Arduous to record and follow up on actions
- Difficult to spot and action performance trends
- Difficult to get corporate based assurance

Enable your front line staff to accurately complete detailed audits quickly and efficiently allowing more time to focus on patient care
