

ACTIVITYMANAGER

Effectively schedule clinical staff around clinical activity.

ActivityManager is a revolutionary way to plan, manage and integrate the activity of medics and entire multi-disciplinary teams, including nurses and AHPs, by intelligently allowing organisations to deploy correctly skilled people and physical locations in the most effective way.

Improve Productivity

Reduce the number of cancelled activities by seeing staff issues ahead of time.

Accessible on-the-go

iPad friendly Planner allows staff to view the clinical activity schedule on the go.

Boost Confidence

Provide staff with the knowledge that they will be working with the right team.

Savings & Cost Control

Reduce costs through better service planning and reduced cancellations.

Effective Deployment

Assigns the correctly skilled people and physical locations around actual activities.

“Allocate Software’s solutions have given us visibility of medical workforce issues in a way that wasn’t possible with a paper-based system”.

Dr Andy Haynes
Executive Medical Director
Sherwood Forest Hospitals NHS
Foundation Trust

“The total amount that we saved was around £1million last year, if you look at the whole medical project, of which around £400k was down to using the Allocate systems.

This year we have identified savings of around £0.75million of which proportionally the large majority came from moving the jobs plans into ActivityManager and also the Junior Doctors.

So, it is with both the Senior Consultants and Juniors in ActivityManager where we are looking to save another £0.75million”.

Dale Travis
Divisional General Manager
Sherwood Forest Hospitals NHS Trust

Effectively schedule clinical staff around clinical activity.

Designed in partnership with healthcare organisations to enable staffing to be managed around activities, from theatres to clinics, radiology and emergency activity. Ensures you get a deeper understanding of the clinical activity, delivered or cancelled, when and with what cost implications. Providing the right care, in the right place, at the right time.

Benefits

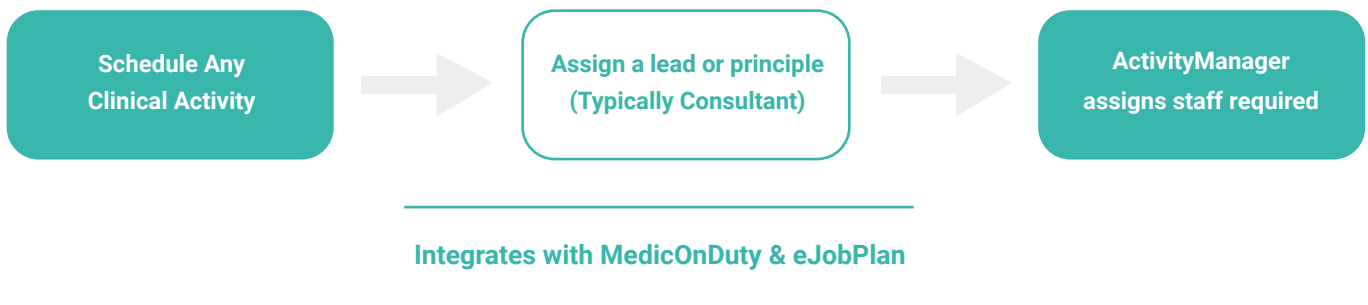

- See the whole team delivering the activity across multiple units, including Consultants, Trainees, AHPs and Nursing.
- Provide consultants with confidence they will have the right team to deliver patient care.
- Reduce the number of cancelled activities.
- Improve patient experience by avoiding last minute cancellations.
- Improve productivity.
- Resources can be quickly redeployed if no longer needed.
- Make savings and safeguard quality by reducing locum reliance.

Features

- Quickly see any activities which are not appropriately staffed and be able to act early.
- See the impact leave and absence is having on clinical activity.
- Powerful reporting and insight; understand exactly what is being delivered; see completed, cancelled and moved clinical activity.
- Easily see staff who are on standby to fill in any gaps.
- Ability to create Activity Profiles, which store the demand for a particular activity type.
- Includes the whole team, not only the activity lead, but also any supporting staff such as junior doctors, nurses, ODPs (Operating Department Practitioners), or specialists.
- Integrates with eJobPlan Locum Management and Bank System (MedicOnDuty).

“It’s no longer good enough for different staff groups or specialisms to organize themselves independently of each other and the clinical activity. I want to know that the entire multi-disciplinary team and the correct physical location is ready for each patient interaction”

Gives clinical staff assurance they are working with the right team in the right place
