

 **ACTIVITYMANAGER**

Effectively schedule clinical staff around clinical activity.

ActivityManager is a revolutionary way to plan, manage and integrate the activity of medics and entire multi-disciplinary teams, including nurses and AHPs, by intelligently allowing organisations to deploy correctly skilled people and physical locations in the most effective way.

**Improve Productivity**

Reduce the number of cancelled activities by seeing staff issues ahead of time

**Accessible on-the-go**

iPad friendly Planner allows staff to view the clinical activity schedule on the go

**Boost Confidence**

Provide staff with the knowledge that they will be working with the right team

**Savings & Cost Control**

Reduce costs through better service planning and reduced cancellations

**Effective Deployment**

Assigns the correctly skilled people and physical locations around actual activities

“

Allocate Software's solutions have given us visibility of medical workforce issues in a way that wasn't possible with a paper-based system”.

Dr Andy Haynes, Executive Medical Director, Sherwood Forest Hospitals NHS Foundation Trust

[Read the full Case Study at allocatesoftware.co.uk >](http://allocatesoftware.co.uk)

“

The total amount that we saved was circa around £1million last year, if you look at the whole medical project, of which around £400k was down to using the Allocate systems.

This year we have identified savings of around £0.75million of which proportionally the large majority came from moving jobs plans into ActivityManager and also the Junior Doctors.

So, it is with both the Senior Consultants and Juniors in ActivityManager where we are looking to save another £0.75million”.

Dale Travis, Divisional General Manager, Sherwood Forst Hospitals NHS Trust

Effectively schedule clinical staff around clinical activity.

Designed in partnership with healthcare organisations to enable staffing to be managed around activities, from theatres to clinics, radiology and emergency activity. Ensures you get a deeper understanding of the clinical activity, delivered or cancelled, when and with what cost implications. Providing the right care, in the right place, at the right time.

New for 2021: Planner is now available within HealthRoster11, making it easier to plan activities. Plus roster screens now have visibility of PA balances which will help make more informed staffing decisions.

Benefits

- See the whole team delivering the activity across multiple units, including Consultants, Trainees, AHPs and Nursing.
- Provide consultants with confidence they will have the right team to deliver patient care
- Reduce the number of cancelled activities
- Improve patient experience by avoiding last minute cancellations
- Improve productivity
- Resources can be quickly redeployed if no longer needed
- Make savings and safeguard quality by reducing locum reliance
- New for 2021: multi select filtering making it easier to focus on particular activities.
- New for 2021: Clear visibility of the Supervisor for junior staff working on Activities which meets the needs of the Cappuccini test for Anaesthetic
- New for 2021: See staff who haven't delivered their activity quota and you can choose these ahead of other staff to help them reach their activity targets

Features

- Quickly see any activities which are not appropriately staffed and be able to act early.
- See the impact leave and absence is making to clinical activity
- Powerful reporting and insight; understand exactly what is being delivered, see completed, cancelled and moved clinical activity
- Easily see staff who are on standby to fill in any gaps
- Ability to create Activity Profiles, which store the demand for a particular activity type
- Includes the whole team, not only the activity lead, but also any supporting staff such as junior doctors, AHPs, nurses, ODPs (Operating Department Practitioners), or specialists
- Integrates with eJobPlan Locum Management and Bank System (MedicOnDuty)
- New for 2021: New look and feel for the Activity Views to make the screens more compelling and easier to use with clear visibility of staffing gaps
- New for 2021: Staff for the current unit appear at the top of the list, so for a theatre session the Lead Consultant for the particular specialty will show first in the list, making it quicker to build activities
- New for 2021: The Roster screens now have visibility of PA balances which will help make more informed staffing decisions

"It's no longer good enough for different staff groups or specialisms to organize themselves independently of each other and the clinical activity. I want to know that the entire multidisciplinary team and the correct physical location is ready for each patient interaction"

Integrates with MedicOnDuty & eJobPlan

Gives clinical staff assurance they are working with the right team in the right place
